

Quality management policy of the SoftReal Software Development Company Ltd.

"We are developing highly available, 24 x 7, customized,
state-of-the-art software"

SoftReal Ltd. attaches special attention to the outstanding quality of its software products through their whole lifecycle, from design through installation to the persistent support of the products in operation. In order to satisfy these demands, the activity of the company is supervised by our quality management system in compliance with the standard **EN ISO 9001:2015**.

We determine our quality objectives to achieve maximal effectiveness in consideration of the rapidly changing social environment and software technology and according to the prevailing demands of our customers.

- We are continuously modernizing our materials, we always use the best developing environment available.
- Our products are updated along with the introduction of the new development tools, and are also enhanced with the achievements of the new technology.
- We keep the knowledge of our experts up-to-date, most recent tools are available for each employees.
- We are committed to improve our installed systems according to the demands of our customers.
- The company always fulfills its obligations on time, according to contract.

The company's management makes the employees and subcontractors acquainted with the policy, objectives, structure and regulations of the quality management system, and requires them to comply with it.

Budapest, May 02, 2018.
